

Appl. No. 10/659,544  
Amdt. Dated Nov. 29, 2004  
Reply to Office Action of Oct. 4, 2004

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listing, of claims in the application:

**Listing of Claims:**

Claim 1 (currently amended): An electrical card connector comprising:

a terminal module comprising an insulative housing and a plurality of terminals received in the insulative housing;

a shell assembled to the terminal module and comprising a cover covering the terminal module and a pair of lateral walls extending from opposite sides of the cover;

an ejector assembled to one of the lateral walls of the shell;

a shutter mechanism comprising a mounting member assembled to the shell and the ejector, and a door member pivotally assembled to the mounting member;

wherein the mounting member comprises a base plate, a first <sup>arm</sup> and a second arm extending from the base plate, the first arm being retained to the shell and the second arm being retained to the ejector;

wherein the mounting member further comprises a resilient member comprising a main body, a first finger, and a second finger engaging with the base plate of the mounting member, wherein the door member comprises a base portion engaging with the first finger and a first post extending from the base portion and assembled with the main body;

wherein the door member comprises a second post, and wherein the

first and the second arms of the mounting member define a pair of holes  
pivotally receiving the first and the second posts.

Claim 2 (canceled)

Claim 3 (currently amended): The electrical card connector as described in claim 3 1, wherein the second arm comprises a vertical part and a horizontal part connecting to the vertical part.

Claim 4 (currently amended): The electrical card connector as described in claim 2 1, wherein the other of the lateral walls of the shell is formed with a stopping projection, and wherein the first arm of the mounting member comprises a spring finger engaging with the stopping projection.

Claim 5 (currently amended): The electrical card connector as described in claim 2 1, wherein the ejector comprises a frame formed with a stopping projection, and the second arm of the mounting member is formed with a spring finger engaging with the stopping projection.

Claim 6 (canceled)

Claim 7 (canceled)

Claim 8 (currently amended): The electrical card connector as described in claim 7 1, wherein the door member comprises a third post, and wherein the first arm of the mounting member defines a track movably
